

IN PLANE SIGHT

Geoengineering, 5G, and Agrochemical: Impacts on the Islands
June 11, 2019

Hawaii Innovation Center at Hilo
117 Keawe Street #105
Hilo, Hawaii 96720

5:30 - 7:30p

Bee Heroic and Green Collar Technologies present: In Plane Sight - Climate Engineering, 5G, and Agrochemical - Impacts on the Islands.

Bee Heroic will present on the issues and impacts surrounding geoengineering, 5G, and agrochemical practices and technologies. From large scale climate engineering, to dangerous cellular technologies, and poisoning of soils, plants, pollinators, and our skies, corporate take-over of nature is

leaving Hawaii's once thriving islands, *in the dust*.

Bee Heroic will discuss the scope and depth of these projects as well as provide action steps that can be taken by communities to protect themselves. Join us in working to

preserve the great pollen nation. Mahalo.
