

Dying Trees. Dying Bees.

Weather Modification: *Economic, Environmental, and Social Impacts; and what you're not being told by MSM and city/county/state leaders.*

Bee and Tree Stroll:

Bee Heroic will cover geoengineering issues and impacts: from soils, plants and pollinators, to health, and economies; closing with reasons behind mainstream media blackout; city/county/state failure to warn about these issues, and their impacts on taxpayers.

When: Sunday, July 7, 2017 ~ 3 - 4pm

Where: Starts @ Boulder Amphitheater, Ends @ Full Cycle on Pearl St

Other: Free and open to the public: ADULT focused. Under 18 must be accompanied by adult.

For more info: beeheroic@gmail.com,

Bee aware. Bee proactive. Bee heroic.

The Earth is losing it's valuable pollinators (birds, bats, insects, small mammals) at a dangerous rate.

Dead and dying trees/plants and pollinator are the new normal globally. From farms to fires, weather modification programs/projects impact our safety, economies, environment and personal/biological health.

We have a handful of years left to save viable stands of trees/plants, our soil microbes, and viable pollinator populations - all of which we depend on for survival. **Bee Heroic will be presenting on these issues** and how climate geoengineering projects are involved.
